**Abstract**

A towel-mat includes a frame member being formed from a flexible twistable material, a first membrane (120), and a second membrane (110). The first membrane (120) has a perimeter portion to which a frame member (130) is fixedly attached. The second membrane (120) has a perimeter portion. The second membrane (110) is removably attachable to the first membrane (110).
